# The anatomy of a next level system

---

## Inventory Monitoring by Thresholds

Dynamically create thresholds rules to monitor your Stock Level by warehouse location and SKUs

Threshold rules will trigger system alerts to users which are accessible via dashboard or by transactions.

The screenshot displays the FOXWMS interface with several key components:

- Inventory Table:** A table with columns: ItemCode, Description, Unit, and Sum. It shows a list of items with their respective units and stock levels.
- Navigation Menu:** A dark sidebar on the left containing options like Dashboard, Master Data, Inventory, Incoming, Outgoing, Reports, Approval, Users, Custom Fields, Document Series, and Approval.
- Create Threshold Modal:** A form for setting up a new threshold rule. It includes fields for Warehouse (Carmona Warehouse), Item (Pantene Conditioner), Status (Active), and a table for defining thresholds by Unit, Location, Minimum Quantity, and Maximum Quantity.
 

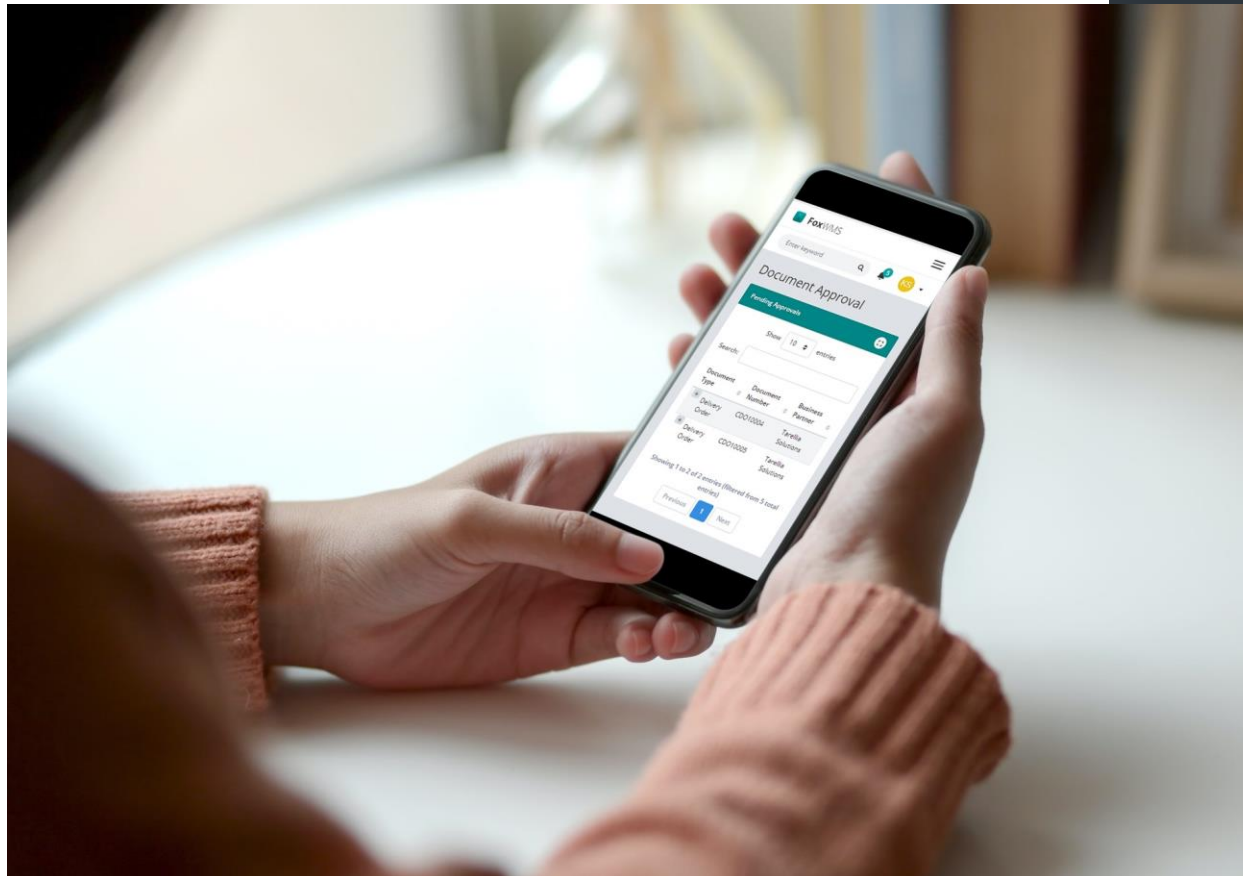

Unit	Location	Minimum Quantity	Maximum Quantity
SW	DES2	300.00	500.00
		0	0
- Manage Threshold Modal:** A form for editing an existing threshold rule, showing the same fields as the 'Create Threshold' modal.
- OUT OF STOCK Table:** A table with columns: RefNum, Name, Unit, DAYS OOS, and Warehouse. It lists items that are out of stock, with a red background highlighting the 'DAYS OOS' column.

Create threshold rules by location and SKUs.

## Digitalization of your inventory

FoxWMS supports Barcode, RFID, and QRCode for maintaining your inventory SKUs, and inbound or outbound transactions. You can also batch print labels for this purpose.

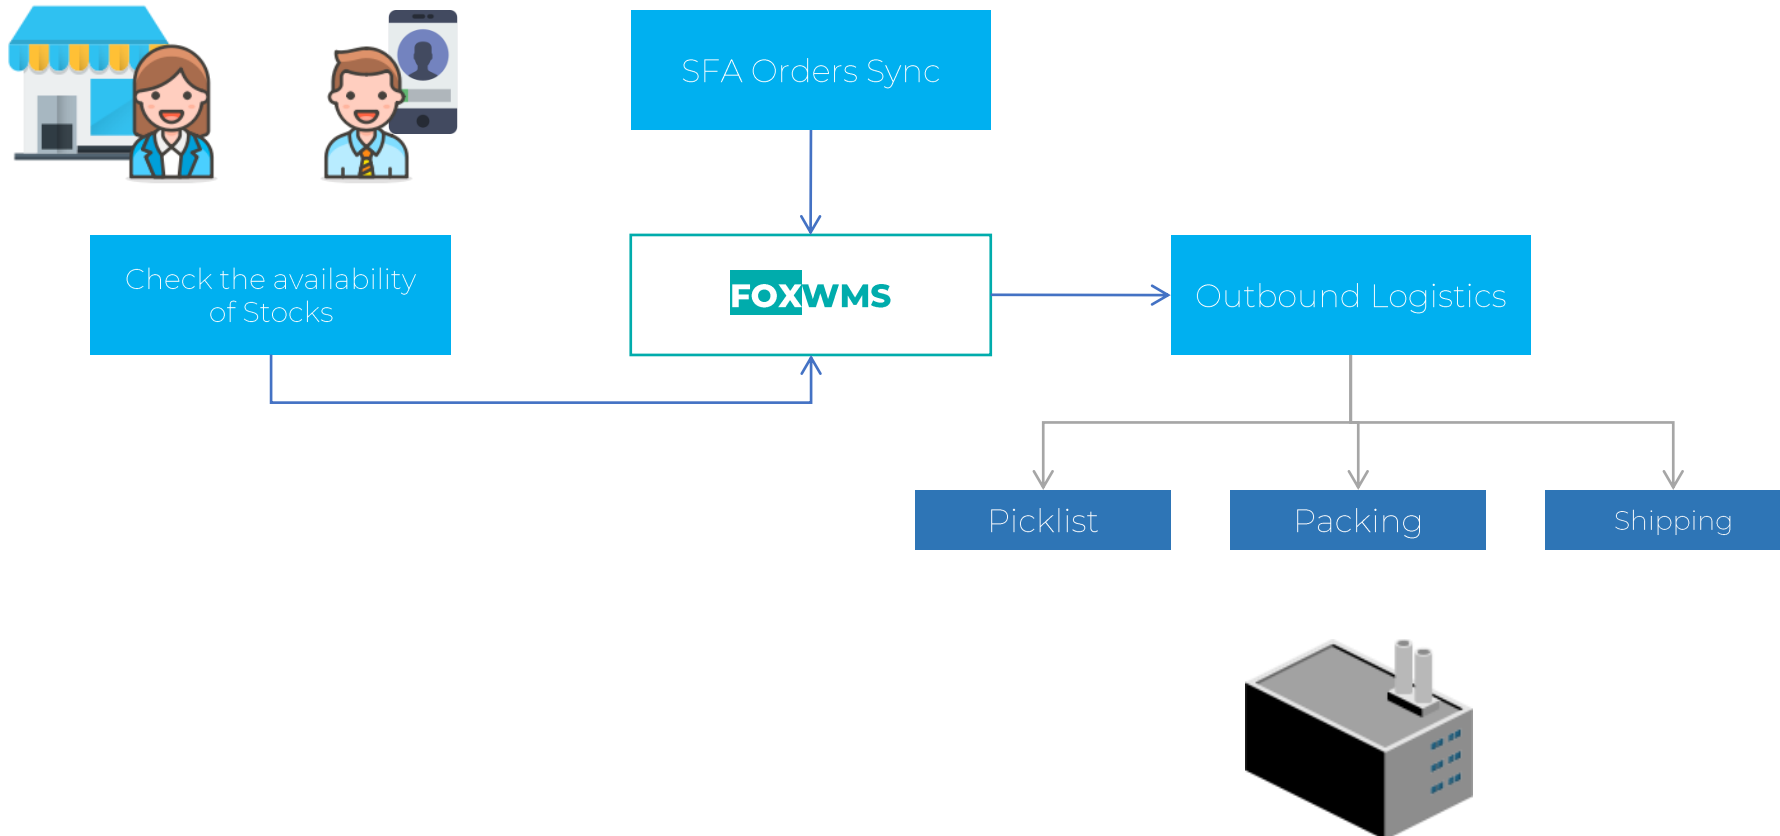

Offers portability and lessens losses, overhead costs and unnecessary documents.

## Fulfillment Support

FoxWMS supports Barcode, RFID, and QRCode for maintaining your inventory SKUs, and inbound or outbound transactions. You can also batch print labels for this purpose.

Offers portability and lessens losses, overhead costs and unnecessary documents.

## Material Requirements Planning (MRP)

FoxWMS MRP modules, allows the business process to monitor raw materials, manufacture finished goods directly from your inventory, based on demand and bill of materials (BOM).

### Benefits of MRP:

- Maintaining only forecasted and required raw materials in store.
- Refocus overhead budget allocation to other business functions, as MRP focuses on analyzing demand and material production.
- Prevents disruption in the business process and fulfillment, as MRP focuses on material demands by finished goods delivered.

The screenshot displays the 'Edit Bill of Material' interface in FoxWMS. The page title is 'Edit Bill of Material [ITMP1001 - B1T1 Pantene Pack]'. The interface includes a sidebar menu on the left with categories like 'GENERAL' and 'ADMINISTRATION'. The main content area has a form for product details and a table for line items.

**Product Details:**

## One license type, non-specific role.

FoxWMS does not need to have different level of licenses, as FoxWMS offers module access roles per user.

- You may specify any role or access to any user without restriction of license level, not like the common models of other applications.
- You are not restricted to have number of same roles, as long as your user base is limited to your subscription (150).

## Analytics and Reports

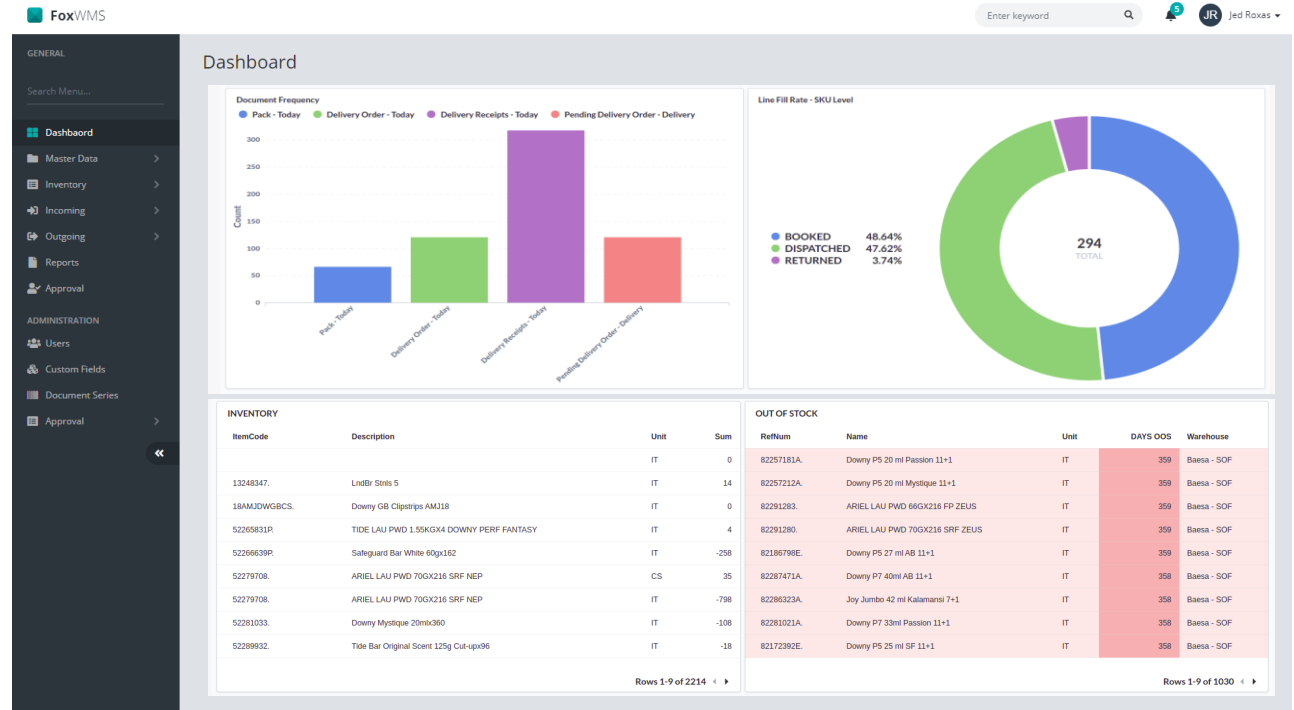

- Intelligent Forecasting of MRP.
- Compatible with other analytics and business intelligence applications such as Microsoft PowerBI, Zoho Analytics, and many more.
